

## Aerodynamic Rain Gauge Bird Spikes

### Features and Benefits

- Compatible with all ARG & SBS raingauges
- Supplied ready to install
- Safe & easy to handle
- Adjustable clamp
- No Gluing or drilling holes
- Bend spikes to cover required area

Rain gauges can often be a target for birds to rest upon or indeed to nest inside if situated in high locations. The spikes provide a barrier which makes it more difficult for birds to land on top of the rain gauge. These bird spikes can help to protect your gauge from any potential damage caused by birds or other small animals.
